Veritas p4.2 SE

... the musical truth.

The P4.2 is now also available in a Special Edition version which became more than an upgrade.

In addition to an asymmetrical Phonar version of the ScanSpeak Illuminator tweeter, this loudspeaker has an elaborate interior lining sandwich cabinet, which eliminates resonances and concentrates the power resources of the moving driver parts on a vital and precise sound.

A significantly upgraded crossover enhances the dynamic and accuracy of the sound.

With a selectable option of a "suction circuit" this speaker can be placed close to a wall.

The P4.2SE is equipped with a high-quality Bi-Wiring binding post terminal and a level control for the trebles.

This speaker is the perfect choice for a hi-fi gourmet with limited space but highest demand on authentic sounding speakers.

Technical Profile

Power (Watts)			130 / 180
Rec. amplification (Watts)			100 – 200
Construction			2 1/2 Wege
Efficiency (dB 1W/1m)			89
